jpg|alternativtext=Ausschnitt aus "Kurzwellentechnik", DASD 1931|mini|Ausschnitt aus "Kurzwellentechnik", DASD 1931]] === <big>Abkürzungen, Verkehrszeichen, internationale Q- und Z-Gruppen</big> ===

Abkürzungen werden bei CW QSOs und bei digitalen Funkverbindungen (wie zum Beispiel bei [RTTY]) verwendet. Die Amateurfunk-Abkürzungen haben ihre Wurzeln zum Großteil in der englischen Sprache.

Prosigns ("procedural signs") oder "Verkehrszeichen" werden hier und in anderen Artikeln auf der ÖVSV-Wiki einheitlich in spitze Klammern "< >" gesetzt und mit ihren gebräuchlichsten Buchstabenäquivalenten benannt.

Zum Beispiel <VE> für das prosign "Verstanden" ("understood"). "Prosigns" bestehen aus denselben Dits und dahs wie die sie bezeichnenden Buchstaben; sie "werden" jedoch "durchgehend gegeben" ""(ohne Pause zwischen Zeichen)". Wo die Buchstabenfolge VE "di-di-di-dah dit ergeben würde, ist mit" <VE> "di-di-di-da-dit gemeint." Hingegen werden "Abkürzungen und Q-Gruppen" wie Wörter, also ""mit Pausen zwischen den Zeichen," gegeben". CQ wird wie eine Abkürzung gegeben, ist kein Verkehrszeichen! Also da-di-da-dit da-da-di-dah! Je besser die Kürzel und auch die Codegruppen beherrscht werden, um so besser und angenehmer wird der Morsetelegraphieverkehr zu gestalten sein.

Im Prinzip stellen die Hilfsmittel eine eigene Sprache dar, die internationale Sprache der Funkamateure, die Grenzen und Sprachbarrieren überwindet. "Eine hier noch nicht eingearbeitete, aber aufgrund ihres Umfanges - sie ist nicht nur als Nachschlagewerk, sondern auch für Recherche zur Entwicklungsgeschichte geeignet - unbedingt zu beachtende Quelle ist ""<span class="

"48° 3' 42" N 16° 32' 23" E" wurden im Seefunk wie folgt angegeben: <code><big>48.03r7 n 16.32r3 e</big></code> oder <code><big>4803r7n 1632r3e</big></code> oder <code><big>48 deg 03 min north 16 deg 32 east</big></code> Quelle: DK5KE, <https://www.qsl.net/dk5ke/morsezeichen.html#zahlen> === Verwendungsbeispiele in der Betriebstechnik === [[Datei: DASDKWTechnikAbk2.jpg|alternativtext=Abkürzungen in der Praxis. Kurzwellentechnik, DASD 1931|mini|Abkürzungen in der Praxis. Kurzwellentechnik, DASD 1931]] ===== Verwendung von 73 ===== Was man unterlassen sollte, ist die Beifügung von Wörtern, welche die Eleganz der Abkürzung schmälern. Schlecht ist z.B. <code><big><s>best 73</s></big></code> oder <code><s><big>73's</big></s></code> ("best best regards" oder "best regards's"). Grammatikalisch korrekt sind: <code><big>73</big></code> ("best regards") <code><big>vy 73</big></code> ("very best regards") <code><big>my 73</big></code> ("my best regards", "seltener als die beiden anderen Varianten") ===== Verwendung von 88 ===== Meines Wissens nach wird die Grußformel nur von yls verwendet und für om schickt es sich, <code><big>73</big></code> zu verwenden [Quelle erforderlich]. ===== Verwendung von <AA> ===== In der Übermittlung von Telegrammen (in ARRL "traffic nets", beim [[CW-Not- und Katastrophenfunk|Not- und Katastrophenfunk]]) zum Zeilenumbruch bzw. zum Trennen von Zeilen in Adreßangaben wie z.B. <code><big>= oevsv dachverbandslokal ""<AA>""</big></code> <code><big>strasse 14 ""<AA>""</big></code> <code><big>iz-noe sued =</big></code> Nicht zu verwechseln mit dem z.B. bei uns als Umlaut-a gebräuchlichen di-dah-di-dah!<blockquote>"Es scheint um das Trennzeichen bzw. "CR/LF" "di dah di dah" zu gehen, um "Felder z.B. innerhalb der Adresse zu trennen". Ich nehme an es ist wirklich ein Zeichen also "AA" mit einem Querstrich drüber. Im "Traffic-Handling" auf dem amerikanischen Kontinent wird es auch auf diese Weise verwendet." "Aber wir schreiben automatisch ein Umlaut-A ;-). Richtig?" "Denn es gibt ja noch das "AA" (di dah di dah, zwei Zeichen). Hier würde der Empfänger darum bitten den gesamten Text (nach dem nach AA genannten Wort) zu wiederholen. Im Video bittet am Ende der OP bei KPH um die Wiederholung einzelner Worte mit "WA" (word after...)" "Im Netz finde ich folgendes von WB8SIW: " ""AA" (di-dah-di-dah) is commonly used in traffic handling to indicate the end of a line in an address or signature." It actually originates in American Morse Code, in which case it is the "comma." The practice of using it to separate the lines of an address or signature in a radiogram was imported into radiotelegraphy from commercial (land-line) telegraph practice many years ago." OE3WYC auf matrix.oevsv.at</blockquote> ===== Verwendung von Q-Gruppen (auch Z-Gruppen) allgemein ===== Q- und Z-Gruppen haben ("wenn auch in wenigen Fällen uneindeutige, sonst aber grundsätzlich") definierte Bedeutungen. Viele Q-Gruppen stellen einerseits eine Aussage oder Aufforderung dar, andererseits - mit einem ? (Fragezeichen) hintangestellt, ebenso eine im selben Kontext formulierte Frage. Auch in Phonie

haben wir es uns oft - leider - angewöhnt, Q-Gruppen zu verwenden, und sie überflüssigerweise in Sätze einzubauen. QRZ wird "unrichtig" verwendet, um andere Stationen zu rufen, wo "OE0XZY, es ruft Sie OE3ZYX" angebracht ist. Die ARRL rät (vor allem im "traffic net"-Verkehr) unbedingt davon ab, Q-Gruppen in Phonie zu verwenden. In Telegraphie entfaltet sich die Eleganz der Betriebsart erst richtig, wenn wir die Möglichkeiten der Verkürzung und Prägnanz, die uns Abkürzungen und Q-Gruppen bieten, korrekt und kompetent nützen. Wir sagen schlicht `<big>QTH nr illmitz nr illmitz</big>`, um zu sagen ""Mein Standort ist bei Illmitz"". Zu sagen, `<big><s>meine QTH ist bei Illmitz Illmitz</s></big>` wäre äquivalent zu ""meine mein Standort ist ist bei Illmitz"". Mit etwas Übung gelingen wunderbar flüssige Aussendungen, die in wenig Zeit eine Fülle an Information zu übermitteln erlauben. Ebenso verwenden wir Q-Gruppen nicht, wo sie formell etwas Ähnliches, aber nicht dasselbe vermitteln. Oft gibt es ohnehin elegantere Ausdrucksweisen. Ein einzelnes `<big>r</big>` sagt der Gegenstation, daß wir alles vollinhaltlich verstanden haben. Ein `<big><s>QSL</s></big>` klingt zwar - "wie Anglerlatein" - Außenstehenden gegenüber professionell, sagt aus, daß wir den Empfang bestätigen - aber tun wir das für jede Aussendung? Schicken wir für jeden einzelnen Durchgang eines QSO eine Bestätigung per Karte? Es hilft nicht, auf Negativbeispiele vollumfänglich einzugehen - die Kernaussage soll sein: * Q-Gruppen haben konkrete definierte Bedeutungen und stellen oft vollständige Aussagen dar, denen nichts hinzuzufügen ist * sie dienen nicht der Obstruktion oder Mystifizierung gesprochenen Textes - sind also zu vermeiden, wo sie nicht angebracht sind * Q-Gruppen können - wenn vorgesehen - mit einem angehängten Fragezeichen eine genau definierte Frage darstellen * sie dienen der präzisen, prägnanten und kurzen Übermittlung von Information und sind damit Teil der Eleganz, die guter Betriebstechnik in der Morsetelegraphie entspringt. ===== Verwendung von QRI ===== Wenn man speziell die Tonqualität der Gegenstation ausdrücken will, gibt es einerseits ja den [[CW-Betriebstechnik Beispiele#Der Rapport .28nach dem RST-System.29|RST-Rapport]]. Im Seefunk und noch bei Marinefunkerclubs gebraucht wird auch QRI. Die Tonqualität reicht von 1 (gut) bis 3 (schlecht). "QRI" wird nicht verwendet, wenn es nicht relevant ist - ein `<big>QRI 1</big>` (guter Ton) wird meist nicht "gegeben!" Beispiel: `<big>... gm lbr om = check ur tcvr = "QRI 3" = ...</big>` ("... guten Morgen, lieber om; prüfe deinen transceiver, dein Ton ist schlecht ...") Als Frage bedeutet `<big>... frisch repariert = nw ohne pa = "QRI?" ...</big>` ("... wie ist mein Ton? ...") Zur Verständlichkeit als Beispiel ein voll übersetzter Rapport, wie wir ihn häufiger sehen: `<big>... ga lbe yl franzi = dein rs""t"" 55""9"" 55""n"" = ...</big>` würde mit [[Abkürzungen#Verwendung von QRK|QSA]], [[Abkürzungen#Verwendung von QSA|QRK]] und QRI so lauten: `<big>... ga lbe yl franzi = QSA 3 QRK 5 ""QRI 1"" = ...</big>` "Merke die Reihenfolge - gewohnheitsmäßig wird QSA/QRK in der für uns umgekehrten Reihenfolge, also SR, nicht RS gegeben!" ===== Verwendung von QRK ===== Eine Q-Gruppe, die im Seefunk statt des [[Abkürzungen#Verwendung von RST|RST-Rapportes]] zusammen mit [[Abkürzungen#Verwendung von QSA|QSA]] verwendet wurde und heute noch bei den Marinefunkerclubs gerne gebraucht wird. Die Lesbarkeit der Zeichen gibt man mit einem Wert von 1 (sehr schlecht) bis 5 (ausgezeichnet) an. Beispiel: `<big>... gm lbr om = QSA 5 ""QRK 5"" = ...</big>` oder `<big>... gm lbe franzi = QSA""QRK"" 5""5"" ...</big>` könnte man in einen im Amateurfunk gebräuchlicheren Rapport von `<big>... = ur ""r""st ""5""99 ...</big>` übersetzen. "Merke die Reihenfolge - gewohnheitsmäßig wird QSA/QRK in der für uns umgekehrten Reihenfolge, also SR, nicht RS gegeben!" Als Frage beispielsweise wird QRK wie folgt verwendet: `<big>... hffe cpi ok = "QRK?" ...</big>` ("...ich hoffe, du kannst mich aufnehmen? "Wie lesbar bin ich?" ...") ===== Verwendung von QRL ===== Beispielsweise beim Finden einer freien Frequenz, auf der man eine Aussendung (z.B. CQ-Ruf) tätigen will: `<big>"QRL?"</big>` "[Pause von 2-3 Sekunden]" `<big>"QRL?"</big></code> "[nochmalige kurze Pause]" <big>CQ CQ CQ de ...</big> Wenn die Frequenz belegt ist, kann es vorkommen, daß folgende Antworten gehört werden: <big>C</big> ("yes") oder <big>Y</big> (ebenso "yes"), oder <big>yes</big> oder eben:`

`<big>QRL</big>` (im Amateurfunk als "This frequency is in use." zu lesen) "In diesem Fall ist auf der Frequenz auf keinen Fall weiter auszusenden - auch kein sri oder gar Nachfragen!" Wenn z.B. einem Störer klargemacht werden soll, daß auf der Frequenz gearbeitet wird, beispielsweise: `<big>... de OE4ZXY "QRL" pse QSY tu ...</big>` ===== Verwendung von QRM ===== `<big>... sri sum "QRM" pse agn ur name? ...</big>` ("... sorry, "ich werde" etwas "gestört", bitte noch einmal Ihren Namen? ...") `<big>... ur rst 399 3nn "QRM 4" ...</big>` ("... Ihr Rapport RST 399, 399, "ich werde extrem gestört" ...) ...und als Frage: `<big>... hr ruft noch jemand, "QRM?" hw? ...</big>` ("... hier ruft noch jemand, "werden Sie gestört?" Wie nehmen Sie mich auf? ..." um festzustellen, ob man vielleicht die Frequenz wechseln muß) ===== Verwendung von QRT ===== Ich weiß, daß es eine Art Gewohnheitsrecht bei weit verbreiteten Verwendungsweisen gibt; aber meine Sicht ist: Wenn ich ankündige, daß ich nichts mehr zu sagen habe, verwende ich `<big>QRU</big>` ("Ich habe nichts mehr vorliegen") und verabschiede mich entsprechend. Schließe ich die Station, gibt es die Abkürzung `<big>cl</big>` ("Ich schließe meine Funkstelle"), die ich zusätzlich angeben kann. QRT benutze ich richtigerweise nur, wenn ich will, daß eine andere Station aufhört, zu senden. "OE9ZYX im QSO, wird jäh durch den CQ-Ruf von OE0QRM unterbrochen:" `<big><span class="col-blue-dark">OE5XYZ de OE9ZYX r fb = fb field day lbe yl hffe wdr nächstes jahr = nw</span> <span class="col-red">CQ CQ CQ de OE0QRM OE0QRM OE0QRM k</span></big>` "OE5XYZ reagiert - sagt der störenden Station, daß man hier beschäftigt ist und sie die Sendung einstellen soll und hofft, daß es verstanden wird:" `<big><span class="col-turquoise">OE0QRM de OE5XYZ QRL QRT tu</span></big>` "OE0QRM fragt nach (und wir hoffen auf die Geduld der beiden anderen Stationen...)." `<big><span class="col-red">de OE0QRM QRT?</span></big>` "OE9ZYX tastet eine wiederholte Aufforderung zur Einstellung, und bittet obendrein, daß OE0QRM eine andere Frequenz sucht:" `<big><span class="col-blue-dark">ja QRT pse QSY tu 73</span></big>` "OE0QRM handelt nun richtig und stellt seine Aussendung ein..." ===== Verwendung von QRZ ===== Mehrmals ist mir untergekommen, daß QRZ? als CQ-Ruf verwendet wird oder gar mit QRL? ("Ist diese Frequenz belegt?") verwechselt wird. QRZ? ist richtigerweise nur dann zu fragen, wenn ich tatsächlich glaube, daß eine Station versucht, "mit mir" Kontakt aufzunehmen. Zum Beispiel: "OE0XYZ ruft mich:" `<big><span class="col-turquoise">OE3IAK de OE["nicht verstanden"] <AR></span></big>` `<big><span class="col-blue-dark">"QRZ?"</span></big>` `<big><span class="col-turquoise">OE3IAK de OE0XYZ <AR></span></big>` "ich wieder:" `<big><span class="col-blue-dark">OE0XYZ de OE3IAK ["...das QSO kann seinen Lauf nehmen"]</span></big>` Es gibt natürlich auch "QRZ" ohne Fragezeichen ("Sie werden von ... gerufen"). Manchmal hört man es in Phonie in der einen oder anderen Konstellation von Rufzeichen. Wenn ich eine Station rufen will, verwende ich es nicht (z.B. `<s><big><span class="col-blue-dark">QRZ OE0XYZ de OE3IAK</span></big></s>` `<big><span class="col-blue-dark">OE0XYZ de OE3IAK <AR></span></big>` `<big><span class="col-blue-dark">OE0XYZ von OE3IAK, Ende!")</span></big>` Es gibt aber doch - äußerst seltene - Fälle, wo QRZ eine praktische Bedeutung findet! Nämlich wenn eine dritte Station gemeint ist: `<big><span class="col-blue-dark">OE0XYZ de OE3IAK "QRZ" OE1ZXY <AR></span></big>` `<big><span class="col-blue-dark">("OE0XYZ, hier ist OE3IAK, Sie werden von OE1ZXY gerufen")</span></big>` Unbedingt aber sollte man das

unterlassen, wenn für OE1ZXY die Chance besteht, daß OE0XYZ sie ohnehin hört - sonst ist man schnell selbst nur QRM!"

`<big><span class="col-blue-dark">... "QRZ" OE1ZXY 7033...</span></big></code>`

`<span class="mx_EventTile_body markdown-body">("Sie werden von OE1ZXY auf 7033 (kHz)`
gerufen") ist ein schönes Beispiel, direkt aus der [\[https://www.itu.int/dms_pubrec/itu-r/rec/m/R-REC-M.1172-0-199510-I!!PDF-E.pdf ITU-Recommendation M.1172\]](https://www.itu.int/dms_pubrec/itu-r/rec/m/R-REC-M.1172-0-199510-I!!PDF-E.pdf)

===== Verwendung von QSA ===== Eine Q-Gruppe, die im Seefunk statt des [\[\[Abkürzungen#Verwendung von RST|RST-Rapportes\]\]](#) zusammen mit [\[\[Abkürzungen#Verwendung von QRK|QRK\]\]](#) verwendet wurde und heute noch bei den Marinefunkerclubs gerne gebraucht wird. Die Signalstärke gibt man mit einem Wert von 1 (sehr schlecht) bis 5 (ausgezeichnet) an. Beispiel: `<big>... gm lbr om = "QSA 5" QRK 5 = ...</big></code> oder <big>... gm lbe franzi = "QSA"/QRK "5"/5 ...</big></code> könnte man in einen im Amateurfunk gebräuchlicheren Rapport von <big>... = ur r"s"t 5"9"9 ...</big></code> übersetzen. "Merke die Reihenfolge - gewohnheitsmäßig wird QSA/QRK in der für uns umgekehrten Reihenfolge, also SR, nicht RS gegeben!" Als Frage beispielsweise wird QSA wie folgt verwendet: <big>... conds werden schlechter = "QSA?" ...</big></code> ("...die Bedingungen werden schlechter; wie ist meine Signalstärke? ...")`

===== Verwendung von QSL =====

"Meistens gar nicht!" Auch in der Phonie mag es Außenstehenden vielleicht den Anschein von Professionalität geben, wenn wir anstatt "ja", "richtig", "verstanden" &c. QSL verwenden. Die Verwendung von Q-Gruppen in Phonie will ich hier nicht weiter besprechen. QSL meint "Ich bestätige den Empfang." und hatte im kommerziellen Funk noch eine sehr explizite Bedeutung, nämlich daß tatsächlich auf schriftlichem Wege der Empfang eines Telegramms - "rechtlich bindend" - bestätigt wurde. Wir können es heute noch verwenden, um erhaltene Rundsprüche zu bestätigen, oder etwa empfangene Telegramme (im "traffic net" und im [\[\[CW-Not- und Katastrophenfunk|Notfunkverkehr\]\]](#)). Im Amateurfunk, um der Gegenstation mitzuteilen, "verwenden wir ausschließlich" `<big>r</big></code> ... ("ein einzelnes R!") Ich habe verstanden <big>r ok</big></code> ... ebenso - Ich habe verstanden, alles OK <big>VE</big></code> ...`

Verkehrszeichen, gleichbedeutend wie "R", merke: VErstanden Und das sagen wir im QSO "nach dem Rufzeichnennen" zu Beginn unserer Aussendung und "nur dann, wenn wir wirklich" alles "verstanden haben" und wissen, was uns das Gegenüber sagen wollte. "Was aber, wenn wir etwas nicht verstanden haben?" Dann kommunizieren wir das auch unbedingt. Wir müssen ja nicht unbedingt fordern, daß uns alles wiederholt wird. Sondern wir sagen einfach, was uns unklar ist! Dafür gibt es z.B. `<big>most ok</big></code> ... Das meiste verstanden <big>part ok</big></code> ... einen Teil Zum Beispiel beschreibt uns die Gegenstation ihre Arbeitsbedingungen und wir haben alles vollständig aufnehmen können: <big>W0DX de OE0WIR "r" = ...</big></code> ...oder wir haben nicht alles aufnehmen können: <big>W0DX de OE0WIR "part ok" = ur rig fb = "pse agn ur antenna?" ...</big></code> Haben wir aber ein Telegramm für die Weitergabe an eine Amateurfunkstelle erhalten, mit Nachrichtennummer &c., dann <big>OE0NOT de OE0FNK r = "QSL" = QRU? = ...</big></code> ("OE0NOT, hier ist OE0FNK, verstanden; "ich bestätige den Empfang (des Telegramms)"; haben Sie noch etwas vorliegen? ...") Oder als Frage <big>...es geht uns gut = mami und papi <AR> "QSL?" <AR> OE0FNK de OE0NOT k</big></code> ("...es geht uns gut; gezeichnet Mami und Papi" - Ende der Nachricht - "Können Sie den Empfang bestätigen?" Ende, OE0FNK, hier ist OE0NOT, kommen!")`

===== Verwendung von QSY ===== `<big>... pse "QSY" ...</big></code> ("bitte "wechseln Sie die Frequenz"", z.B. um einen Störer aufmerksam zu machen) <big>... "QSY 7033" ...</big></code> oder <big>... "QSY UP 1" ...</big></code> ("bitte wechseln Sie auf 7033 kHz" bzw. bitte "wechseln Sie auf einen kHz höher") und als Frage <big>... "QSY?" ...</big></code> ("soll ich die Frequenz wechseln?")`

===== Verwendung von RST =====

===== Der Rapport (nach dem RST-System) ===== Wenn wir einen Rapport bekommen oder geben, so geschieht dies selten mit [\[\[Abkürzungen#Verwendung von QSA|QSA\]\]](#) [\[\[Abkürzungen#Verwendung von QRK|QRK\]\]](#), meistens mit dem RST-System. RST steht kurz für "readability" (Lesbarkeit), "signal" (Signalstärke), "tone" (Ton). `<big>ur "rst" 599 5nn</big></code> (für <big>nn</big></code> siehe \[\[Abkürzungen#Zahlen und ihre Abkürzung|abgekürzte Zahlen\]\]) würde also bedeuten: Sie sind einwandfrei lesbar, Ihr Signal äußerst stark, der Ton tadellos - also ein tadelloser`

Rapport! `<big>ur ""rst"" 339</big>` würde bedeuten: "Sie sind nur mit Schwierigkeiten aufnehmbar, Ihr Signal schwach, der Ton tadellos." Gelegentlich verwendet man auch Teile, um etwas Bestimmtes ausdrücken zu wollen: `<big>... all fb but sometimes ""t2"" ...</big>` ("... alles ausgezeichnet, aber "Ihr Ton ist" manchmal "sehr roh" ...") ===== R ("readability") ===== # nicht lesbar # zeitweise lesbar # mit Schwierigkeiten lesbar # ohne Schwierigkeiten lesbar # einwandfrei lesbar ===== S ("signal") ===== # kaum hörbares Signal # sehr schwaches Signal # schwaches Signal # mittelmäßiges Signal # ausreichendes Signal # gut hörbares Signal # mäßig starkes Signal # starkes Signal # äußerst starkes Signal ===== T ("tone") ===== # äußerst roher Wechselstromton # sehr roher, unmusikalischer Wechselstromton # roher Wechselstromton, leicht musikalisch # leicht roher Wechselstromton, mittelmäßig musikalisch # musikalisch modulierter Ton # modulierter Ton, leichter Triller # instabiler Gleichstromton # gefilterter Gleichstromton, etwas Brummodulation # reiner Gleichstromton ===== Suffixe an das RST... ===== ...können wie folgt angehängt werden zur Beschreibung v.a. des Tones - Beispiel `<big>ur rst 579"C"</big>` ("Ihr Signal ist ausgezeichnet lesbar, mit mäßig starkem Signal, reinem Gleichstromton und dieser ""zieht sich"" etwas ""beim Tasten"" ""-"" ich höre ""chirps"""): A - Signal durch Aurora-Propagation verzerrt C - ""chirp"" - zwitschernder Ton (es gibt auch ""yoop"" - wenn Ihr es hört, wißt Ihr sofort, was gemeint ist!) K - Tastklicks, "key clicks", harte Tastung, die auch in den Seitenbändern noch zu hören ist M - Signal durch "multipath"- oder Mehrwegausbreitung verzerrt S - Signal durch "scatter"- oder Streupropagation verzerrt ===== Quellen ===== DK5KE <https://www.qsl.net/dk5ke/rst.html#rst> <http://www.antentop.org/w4rnl.001/rst.html> <https://www.no5nn.org/rsn/> - lesenswert, da auch Alternativen diskutiert werden (vln dk OE7FTJ) ===== Verwendung von <VA> - end of work ===== Das Verkehrszeichen <VA>, ""end of work"" deutet der Gegenstation an, daß man am Ende des QSOs angelangt ist und die Arbeit/Verbindung zu Ende ist (nicht zu verwechseln: QRU im Gegensatz bedeutet nur die Ankündigung, daß man nichts mehr vorliegen hat). Während die einzelnen Durchgänge/Aussendungen eines QSO mit <AR> (Spruchende) abgeschlossen werden: `<big>... fb mni tks fer info on ur qrp stn = ere also qrp running 5w into efhw up 10m = hw? <AR> OE3ZYX de G0XYZ k</big>` so schließt man die letzte Aussendung mit <VA> (Verbindungsende). `<big>...so nw QRU dr yl mni tks fer QSO vy 73 es cuagn sn ""<VA>"" G0XYZ de OE3ZYX k</big></code> "(OE3ZYX gibt G0XYZ noch zurück - k - für die Verabschiedung)" Das Muster im QSO-Verlauf ist also <big>[Spruch] <AR> G0XYZ de OE3ZYX k</big></code> <big>[Spruch] <AR> OE3ZYX de G0XYZ k</big></code> <big>[Spruch] <AR> G0XYZ de OE3ZYX k</big></code> <big>[Spruch] <AR> OE3ZYX de G0XYZ k</big></code> <big>[letzter Spruch] ""<VA>"" G0XYZ de OE3ZYX k</big></code> <big><big>[letzter Spruch] ""<VA>"" OE3ZYX de G0XYZ see u ee</big></big></code> Oft auf den Bändern gesehen wird die Anwendung nach dem Adreßteil - es ist mir zum Zeitpunkt nicht möglich, eine der Varianten als letztgültig zu verteidigen. Meine persönliche Präferenz ist: prosigns zwischen den Adreßteilen - also die obere Variante, [https://www.naqqc.info/cw_qsos.html K3WWP von North American QRP club beschreibt sie], und [https://www.amateurradio.com/basic-cw-operating-procedures/ hier (amateurradio.com) wird die Vorgangsweise näher erläutert]. [https://www.qsl.net/dk5ke/qso.html DK5KE gibt in seinen Beispielen] entweder eine verkürzte Form an oder verwendet <VA> nach dem Adreßteil. <big>[Spruch] <AR> ... de ...</big></code> <big>[Spruch] <AR> ... de ...</big></code> <big>[letzter Spruch] <AR> ... de ... ""<VA>""</big></code> === Weitere Recherchehinweise === [[Datei:FuchsFaschingAbk.jpg|alternativtext=Fuchs, Fasching: Signalführer für den Kurzwellenverkehr|mini|Fuchs, Fasching: Signalführer für den Kurzwellenverkehr]] Es gibt noch viel mehr Q-Gruppen wie auch Z-Gruppen und andere Abkürzungen. Manche dieser Gruppen sind landes- oder bündnisspezifisch definiert und daher nicht international einheitlich. Ebenso gab es historische Änderungen; "die Interpretation mancher Gruppen ist also stets kritisch im Kontext der Verwendung und unter Berücksichtigung des Urhebers zu sehen!" Neben dem oben bereits verwiesenen ""<span class=""`

mx_EventTile_body markdown-body ve-pasteProtect">Radiotelegraph and Radiotelephone Codes, Prowords And Abbreviations for the Summerland Amateur Radio Club"" von John Alcorn, VK2JWA ["<https://web.archive.org/web/20160603053050/http://www.qsl.net/wd8das/RadioCodes.pdf><span class="

mx_EventTile_body markdown-body ve-pasteProtect">" gibt es noch beispielsweise: Historische Abkürzungen, Q- und Z-Gruppen der DDR (eine Mischung aus deutschem Militär wie Warschauer Pakt): <http://scz.bplaced.net/qsl.html> US- bzw. NATO-Z-Gruppen: <https://www.pwcares.org/doc/Z-Signals.pdf> Q- und Z-Gruppen von Staaten des ehemaligen Warschauer Paktes: <https://www.udxf.nl/CIS-mil-QandZ-codes.pdf> Q- und Z-Gruppen sowie Abkürzungen des Commonwealth und der USA: <https://web.archive.org/web/20111119091213/http://www.armymars.net/ArmyMARS/DigitalOps/Resources/acp131-operating-sigs.pdf> Für (historische) Abkürzungen aus der drahtgebundenen Telegraphie ist der Phillips code von 1879 heranzuziehen. Teilweise haben sie den Weg in das spätere im Amateurfunk gebräuchliche Repertoire gefunden. https://archive.org/details/book_20190917/page/n31/mode/2up Historische deutschsprachige Abkürzungen können in diversen Dienstvorschriften der Telegraphietruppen gefunden werden. === Quellennachweis === [1] KX4O Ham Radio .
