WINMOR Protocol Specification (Preliminary)

Version: 1.0.0.0 Oct. 13, 2009
Rick Muething, KN6KB

1.0 Introduction
This document is a preliminary specification for the WINMOR protocol. It is intended to provide a common framework for the development of WINMOR software and hardware. The protocol is designed to be simple, efficient, and easy to implement. It is intended to be used for the transmission of digital data over a radio channel. The protocol is designed to be used for the transmission of digital data over a radio channel. The protocol is designed to be used for the transmission of digital data over a radio channel.

2.0 Definitions
The following definitions apply to the terms used in this document. The terms are defined in a way that is consistent with the use of the terms in the WINMOR protocol.
