HHD70

The diagram shows the CC1190 module connected to the CC1101 module. The CC1190 module includes pins for PA_OUT, PA_IN, LNA_OUT, LNA_IN, TR_SW, PA_EN, LNA_EN, HGM, and a GND pin. The PA_OUT pin is connected to the PA_IN pin of the CC1101 module. The LNA_OUT pin is connected to the LNA_IN pin of the CC1101 module. The TR_SW pin is connected to the TR_SW pin of the CC1101 module. The PA_EN pin is connected to the PA_EN pin of the CC1101 module. The LNA_EN pin is connected to the LNA_EN pin of the CC1101 module. The HGM pin is connected to the HGM pin of the CC1101 module. The GND pin is connected to the GND pin of the CC1101 module. The CC1101 module includes pins for RF_P, RF_N, and GDOx. The RF_P and RF_N pins are connected to the RF_P and RF_N pins of the CC1101 module. The GDOx pin is connected to the GDOx pin of the CC1101 module. The CC1101 module also includes a SAW filter and a matching network.
