EMV (Elektromagnetische Verträglichkeit)

In dieser Kategorie sind Informationen zu Elektromagnetische Verträglichkeit (EMV) zu finden. Darunter versteht man die Fähigkeit eines technischen Gerätes, andere Geräte nicht durch (ungewollte) elektrische oder elektromagnetische Effekte zu beeinflussen. Oder auch selbst durch andere Geräte gestört zu werden. <https://wiki.oevsv.at/wiki/Kategorie:EMV#/media/File:EMC.jpg|zentriert|mini|600px>

SERIES OF ITU-T RECOMMENDATIONS	
Series X	Organization of the work of ITU-T
Series Y	Staff and accounting systems and international telecommunications' Y' accounts and procedures
Series Z	Fixed network operations, telephone services, service operations and business factors
Series A	Administrative and management aspects
Series G	Transmission systems and networks, digital systems and networks
Series H	Radiation and radiofrequency systems
Series I	Integration between digital systems
Series J	Cable systems and transmission of television, sound programmes and other multimedia
Series K	Passive systems and components
Series L	Environment and ITU-T, climate change, e-mails, emergency communications, terrestrial and satellite systems and services and other aspects of satellite space
Series M	Telecommunications management, including ITU-T and network management
Series N	Telecommunications internationalized network and telecommunication circuits
Series O	Telecommunications management and network management
Series P	Telephone transmission systems, telephone interconnections, land networks
Series Q	Developing and upgrading, and associated measurement and tests
Series R	Radio systems
Series S	Telegraph services and related equipment
Series T	Transmission to electronic systems
Series U	Telecommunications systems
Series V	Data communications over the telephone network
Series W	Data networks, user systems, communication and security
Series Y	Telecommunications systems, telecommunication, business aspects, new generation networks, business of telecommunications and other aspects
Series Z	Language and general advice for telecommunications systems
