Einleitung

This hamradio software project is based on [TCE - Tinycore Linux](#), an embedded software system used on plattformen like industrial pc, ALIX and others, and offers services and possibilities like

- packet radio,
- APRS,
- lightning log,
- small webserver,
- SVX-Link (Echolink)

500MHz LowPower industrial PC

especially in networks like HAMNET and similar.

One goal is a minimum on material expenditure and also a minimal current consumption, followed by a maximum of features

More information on the hamradio TCE - tinycore linux project coming here soon

Help

If you need help on configuring the software packages you can contact us on packet radio convers channel 44.
